Age Resist

Nature and science

Nature has so much to offer, but by mixing essential oils and plant extracts with leading technology and scientifically advanced formulas, we have created a powerful, effective range which goes above and beyond everyday skincare.

Perfect to target specific skin concerns, Age Resist works faster and deeper for visible, enhanced results.

Age Resist uses advanced action ingredients and botanicals to maximum effect. These include:

Peptides – amino acid molecules provide significant anti-ageing benefits by stimulating the dermal layer, increasing collagen and elastin production.

Vitamins – organic compounds such as Vitamin C assist the healthy functioning of the dermis and epidermis, brightening skin by limiting activity which causes uneven tone.

Anti-oxidants – neutralise and limit free radicals, which contribute to skin damage and ageing, and give your skin added protection, rejuvenation, firming and smoothing.

Co-enzyme Q10 – a natural component in skin cells, this is known as the ‘queen of anti-oxidants’ and helps maintain youthful-looking skin.

Hyaluronic Acid – the most effective ‘humectant’ or hydrating compound, this saturates the skin’s layers with moisture to plump, encourage healthy functioning and give a dewy look.

Galbanum – also known as ‘green incense’, it brings incredible skin-rejuvenating benefits by reducing inflammation and reinforcing skin weakened by age.

Rosewood – encourages stimulation of cells, leading to bright, fresh cells and a regenerated complexion.

Soya Bean – rich in amino acids, this potent anti-oxidant strengthens and offers excellent conditioning benefits for smooth soft skin.
